Hiring Manager Name (if available) Title PROLINE property management Company Address

COVER LETTER

Dear [Hiring Manager name],

I am writing to express my strong interest in the Junior Software Developer position at PROLINE property management, as advertised on LinkedIn. While my background may not be traditional for a software developer role, my nine years of experience as a Sales Representative in the bicycle industry have equipped me with valuable skills that I believe would translate well to this position.

Throughout my sales career, I honed my customer service expertise, problem-solving abilities, and meticulous attention to detail. These skills are crucial for understanding user needs, identifying pain points, and developing solutions that enhance the user experience. Furthermore, my passion for helping others perfectly aligns with PROLINE's focus on providing exceptional support to clients.

My desire to transition into the tech industry led me to pursue a Web Development program at CornerStone International Community College. This program provided me with a strong foundation in web development technologies, including TypeScript, JavaScript, HTML/CSS, Node.js, Next.js, React, and tailwindCSS. To further solidify my skills, I actively participated in both a volunteer and personal project. In the volunteer project, I co-developed a food management web application using Next.js/TypeScript and tailwindCSS. This project honed my frontend development skills and fostered collaboration with designers to create an intuitive and user-friendly interface. Additionally, I built a personal shopping memo LINE-bot, utilizing TypeScript, Supabase, and Deno. This project allowed me to explore back-end development concepts with a focus on CRUD operations and database communication.

I am particularly drawn to PROLINE's company culture, which emphasizes collaboration, innovation, and a positive work-life balance. The opportunity to contribute to modernizing property management systems while working alongside a friendly and supportive team is incredibly exciting. I am confident that my eagerness to learn, combined with my existing skillset and technical foundation, makes me a strong candidate for this position. I have attached my resume for your review and would welcome the chance to discuss my qualifications further in an interview. Thank you for your time and consideration.

Sincerely,
Shuhei Ota
