SUMMARY

With over nine years of experience as a Sales Representative, I bring a unique blend of customer service expertise, problem-solving skills, and a keen eye for detail. My background has equipped me with the soft skills necessary for success in the tech industry, particularly in roles requiring close interaction with users and clients. I am eager to leverage my unique combination of soft skills, technical skills, and personal qualities to contribute to innovative web solutions.

PROJECTS

Frontend Developer

October 2023 – March 2024

Project: Nishiki

Vancouver, Canada

This is a group volunteer project to create a food management web application that remembers what a user has in their refrigerator or can be used as an imaginary container that shares the food/drinks among a group, to avoid duplication.

- Frontend Development: Utilized Next.js/typescript and tailwindcss to build the frontend components
- Design Collaboration: worked closely with designers on UI/UX designs, focusing on creating intuitive and visually appealing experiences
- Testing and Debugging: Conducted testing to ensure a smooth user experience

Used Technologies: TypeScript, React, Next.js, tailwindCSS, shadcn/ui, Zod, jest

Developer

March 2024 – April 2024

Project: Line-bot

Vancouver, Canada

This is a personal project, a shopping memo, utilizing the communication app LINE which is one of the most famous communication tools in my home country. It has a webhook feature to query and manipulate data from the database.

- CRUD operation: Utilized webhook feature from LINE web API and implemented communication with the database.
- Cloud Database: set database in supabase and utilize its edge function to implement the application.

Used Technologies: TypeScript, supabase, Deno
