SUMMARY

Humble, motivated, and imaginative Frontend Developer, specialized in technologies such as React, Typescript and TailwindCSS. Strong in customer service and problem solving, I am a collaborative team player eager to learn and contribute to innovative solutions, prioritizing the user and achieving great results.

PROJECTS

Frontend Developer and Co-Founder

October 2023 – March 2024

Project: Nishiki — Link : [Product website](#) | [Github](#) | [Project Document](#)

Vancouver, Canada

As a co-founder, played a pivotal role in conceptualizing and developing the Nishiki food management web application. Demonstrated strong leadership and technical skills in driving the project from inception to completion.

- **Frontend Development:** Utilized Next.js/typescript and tailwindcss to build the frontend components
- **Teamwork/Code Reviews:** Collaborated effectively with team members. Actively participated in code reviews to improve code quality and learn from others. Proactively asked questions to seek clarification and enhance understanding.
- **Testing and Debugging:** Contributed to testing efforts to identify and resolve issues, improving overall application quality.

Developer

March 2024 – April 2024

Project: Line-bot — Link : [Github](#) | [Demo](#)

Vancouver, Canada

Developed a personalized shopping memo application utilizing the Line messaging platform to streamline grocery shopping. Demonstrated creativity, problem solving skills, and empathy while leveraging TypeScript and Supabase to create a robust and efficient backend system.

- **Database Integration:** Effectively integrated Supabase as the cloud database to securely store shopping list items and user information.
- **User Experience:** Empathized with user needs to create an intuitive and user-friendly shopping list experience, allowing users to effortlessly add items and manage their shopping needs.
